

## Omega RS350

### Stone Grinder

**Year of construction:** 2016  
**Machine location:** GSS-11-00213

The RS350 is a stone only machine featuring our racing plus package. The RS350 includes an intuitive touch screen display featuring full parameter control, storage of up to 100 different structures and the "Easy Go" quick selection button. The racing plus package includes all option to create the complete race service machine. The structure package gives you the option of creating and applying an unlimited variety of structures. The package includes a high-performance dressing unit. In addition, the optimized centering system ensures easier handling, even for center specific structures. The feed package for the Omega RS350 supports specific adjustment of pressure curves thanks to pneumatic pressure control. At the same time, the dual pedal option adds more flexibility to your workflow. The spray and filtering package addresses these needs with an automatic valve which adapts the stone spraying system to match your workflow.

208 220 volt, 3 AC
