

## Drytech

Solutions for drying, disinfecting, and  
deodorizing work clothing and gear

## WINTERSTEIGER Drytech.

WINTERSTEIGER Drytech is a partner you can rely on for drying, disinfecting, and deodorizing all types of clothing and kits, such as jackets, pants, boots, gloves, and helmets – worldwide.

By investing in professional drying and hygiene systems you are making a positive contribution to staff hygiene and health. And, you are also helping to extend the lifespan of the high-quality clothes or kit. Compared to conventional drying systems, you can also reduce your energy costs with WINTERSTEIGER solutions.

No matter what you want to dry efficiently and hygienically, our experts are here to help you find the right solution for your needs.

## **Contents:**

<b>Product overview</b>	<b>10</b>
<b>Open drying panels</b>	<b>12</b>
<b>Closed drying systems</b>	<b>20</b>
<b>Accessories</b>	<b>30</b>

## Your benefits summed up.

**Quality "Made in Austria"**

**The latest production facilities, our own R&D department, in-house engineering and production – everything from a single source**

**Many years of experience in producing metal lockers and drying systems**

**Innovation and market leader in the field of drying systems**

**Wide range – the optimum solution for every requirement**

**Complete planning expertise – from the 2D base dimension planning to 3D visualization and planning**

### **Drying guarantee**

- **Material-friendly drying time:**  
Each unit can be individually adjusted, so it is gentle on clothing and boots.
- **Space-saving design:**  
Our modular system is available in several sizes and versions to suit different needs.
- **The system grows with you:**  
Unlimited expansion options for any number of boots and items of clothing.

# Fields of application.

Solutions for drying, disinfecting, and neutralizing the odor of clothing and kits, such as jackets, pants, boots, gloves, and helmets.

Shipbuilding/maritime sector

Fishing

Infrastructure (roads, railway, airports)

Food industry

Firefighting

Military and police

Energy suppliers

Chemical and pharmaceutical Industry

Municipal companies

Construction industry

Production and maintenance

Forestry

Farming

Sports clubs (football, tennis, riding)

Private households

# Drying technology

## SpeedDry Rapid air circulation drying.

A high-quality air circulation fan combined with heated air ensures material-friendly and energy-saving kit drying.

- Recirculation drying
- Combination of a powerful fan and a heating system
- Two drying versions: Ambient air drying or heated air drying
- Ambient temperature of 15 °C or above
- Moisture is released via the ambient air
- Plug & Play product
- Optionally with Sterex hygiene function, based on innovative plasma technology
- Quick, gentle kit drying

# INNOVATIVE: Sterex plasma technology. Make germs and unpleasant odors a thing of the past!

## How it works:

In simple terms, this complex process can be outlined as follows: Air is charged using an electronically controlled electrode at high voltage to create a plasma-air mixture. This mixture acts as an extremely effective disinfectant – in the air as well as on surfaces and textiles. The system is maintenance-free and requires no chemical additives.

## Effect:

Depending on the type of device, the disinfectant eliminates up to 99.9 % (3 log stages) of microorganisms in efficacy groups A and B as specified in the RKI List (as issued by the Robert Koch Institute, Germany).

- Efficacy group A primarily covers bacteria, fungi, and fungal spores.
- Efficacy group B covers viruses, including the coronavirus "SARS-CoV-2". This is documented in the RKI List of tested and certified disinfectants and disinfection methods dated October 31, 2017 (17th Edition).
- The STEREX technology also reliably removes unpleasant odors from clothing and work apparel. Disinfection is carried out without the use of toxic or environmentally harmful chemistry. It presents no risk to health.

## Certification:

The disinfectant efficacy of the STEREX technology has been confirmed by the recognized Center of Excellence for Technical Hygiene and Applied Microbiology Dr. Schmelz GmbH (Kompetenzzentrum für technische Hygiene und angewandte Mikrobiologie Dr. Schmelz GmbH) in Malsfeld, Germany by Dr.med. Dipl.-Chem. Dipl-Ing.(FH) Ulrich-Friedrich Schmelz..

## Your benefits summed up:

- Disinfection without the use of toxic or environmentally harmful chemicals
- Extremely efficient against viruses, bacteria, mold, and spores
- Neutralizes the odor of volatile organic compounds such as sweat
- Improves the indoor climate, resulting in fresh, healthy air
- Unlike ozone it is not oxidizing
- Beneficial for health
- Does not damage plastics or synthetic fibers
- Proven technology, for example in drinking water treatment

For further information please visit our website [www.wintersteiger.com/sterex](http://www.wintersteiger.com/sterex)

# An investment that pays off!

## Why choose a professional drying system?

- Protection against moisture and damp air are just as expected as an umbrella, raincoat, and water-repellent shoes these days.
- An efficient drying option is a sign of appreciation
- Dry boots and clothes promote a sense of well-being; it raises employees' morale and can reduce absence due to illness.
- Professional drying is material-friendly and extends the lifespan of boots and clothing.
- If wet boots are only air dried, then different boot materials such as leather, can become brittle and hard and hurt the sensitive skin on the feet.

## What are the defining features of a DRYTECH drying system?

- We process sendzimized high-quality thin-gage sheet metal in quality class A with powder coating
- Surface is perfectly protected against sparks or embers, while also being impact and scratch-resistant and easy to clean
- We only use high-quality components
- All drying devices correspond to the highest safety standards and are CE certified
- High production standard with flexible, largely automated production

## What are the economic benefits of the drying systems?

- Gentle drying process at low temperature and high volumes of air
- Energy-efficient use with timer function
- Motivated, more productive employees
- Potential reduction in the number of staff sick days because of damp work clothes and gear
- Drying systems from WINTERSTEIGER Drytech can be extended at any time
- Easy device maintenance and repairs

# Drying solutions for all applications.

# Tantum

The Tantum series drying units are available in a range of different versions and cover a wide selection of optional equipment.

## **We make a distinction between two product groups:**

- Tantum Boot
- Tantum Set

### **Maximum quality.**

We only process hot galvanized high-quality thin-gage sheet metal. Together with our in-house powder coating, we ensure maximum corrosion protection.

### **Material-friendly drying.**

A high-quality air circulation fan integrated into the body combined with heated air ensures material-friendly and energy-saving kit drying.

### **xControl.**

The new xControl control unit with color display and industrial membrane keyboard offers users an easy, intuitive and multi-lingual user interface for managing the timing and energy of the system.

The timers can be easily adjusted with the ability to activate a countdown timer. The xControl control unit also offers the option of activating a definable drying cycle via an external input (EIB/home automation, etc.).

Tantum Boot

Tantum Set

Prepared for wall mounting

SpeedDry drying system

Removable stainless steel blow-out clothes hanger (air hanger)

Easy operation thanks to the new xControl unit with color display

New, extremely robust, anodized aluminum oval drying arms for gloves with unique blow-out end caps

New, extremely robust, anodized aluminum oval drying arms for boots with unique blow-out end caps

Foot, optionally available

## Tantum Boot 10 Boot dryer

20 aluminum drying arms (alu oval) with special plastic drying nozzles for boots

xControl

Foot optionally available

Also available in stainless steel

# Reference Projects

## Varta Microbattery GmbH Ellwangen, Germany

Personal protective equipment is vital for employees working in battery manufacturing.

## efko Eferding, Austria

Food processing company efko, based in Eferding, Austria, uses the boot and shoe dryer to dry work shoes and rubber boots.

## Disposal companies Constance, Germany

Drying locker for complete sets of work gear.

## Driving school Wintersteller Bad Ischl, Austria

Driving schools in the Salzkammergut, Austria, opt for a professional drying device for drying motorcycle gear.

## Fire Department Ried im Innkreis, Austria

The fire-fighting equipment is dried efficiently, carefully, and hygienically, and is ready for use again in just a few hours.

## City Neumünster Neumünster, Germany

Dry and disinfect their full work gear and protective footwear from street and canal maintenance, waste collection and green space maintenance.

## Radatz Vienna, Austria

Preheated work gear, coats, pants and shoes for the employees in the cold storage.

## Dyemansion Munich, Austria

Global market leader in the field of innovative surface finishing and customizable solution for drying plastic components.

## Kindergarten Admont Admont, Austria

Admont kindergarten and day nursery relies on professional drying equipment for the drying of wet shoes and clothes.

# WINTERSTEIGER. A Global Player.

WINTERSTEIGER AG is an international machinery and plant engineering group. Founded in 1953, it has gradually established itself as a leading provider of innovative solutions for customers in technically sophisticated niche markets. The business fields of the company consist of:

## ■ SEEDMECH

- Turnkey solutions for plant breeding and research

## ■ SPORTS

- One-stop supplier for the rental and servicing of sports products
- Systems for hygienic drying of sports goods and work clothes
- Custom solutions for feet

## ■ WOODTECH

- Process solutions for precision thin-cutting, wood repairs and cosmetics
- Saw blades for wood, food, and metal
- Machines for mobile and stationary sawmills
- Plants and automation solutions

## ■ METALS

- Levelling technology machines and systems
