

2020 WINTERSTEIGER Machine Service Program

WINTERSTEIGER

Thinking about tomorrow.

You expect the best from your Wintersteiger machines and we want to help you achieve the best results in every way that we can. One of the most important steps you can take in the care of your machines is to have one of our highly skilled technicians perform the annual Preventive Maintenance. Signing up for our Preventive Maintenance Program is the best way to make sure that small issues are addressed before they turn into problems. During a PMP visit, your technician will recommend and perform the service necessary to bring your machine up to top-notch operating condition. They can also offer advice about accessories, shop supplies, or machinery to help you bring your service shop to the next level.

Sign up for your PMP **before May 1st, 2020** and schedule the service with your technician on one of their planned service loops to receive the following benefits:

- **10% discount** on parts and labor used during the PMP
- **Extended payment terms** until Oct. 15th, 2020 – service can be scheduled anytime, the invoice isn't due until the Fall
- **Waived Service Fee** on in-season service calls after the PMP – Only pay the service fee once for the entire season

•There is a flat rate for each machine at a single location (see chart below) •The age and condition of your machine may require more than the allotted hours, in which case additional labor will be billed per hour •Additional Travel Fee may apply if you required the PMP service to be performed outside of one of our scheduled service loops to your area.

Please mail this completed form, call us at the number below, contact your local service tech, or go to the web address below to fill out the on-line sign up form
