

### RAUTE: SMART UTILISATION OF TECHNOLOGY

Smart utilisation of the latest technology together with a wide range of services will ensure profitable production for all Raute's customers.

The RautePro, RauteSelect and RauteSmart are designed to meet the needs of plywood and LVL producers around the world. Its network of global service centres supports its customers with spare parts and strong mechanical and automation know-how.

Learn how to optimise the installation of new equipment or modernisation of existing machinery. Innovations such as

advanced machine vision and analysers, automatic panel repairing, Patchman P2 and Smart Scan HD can speed up production.

Raute will be at Hall 27, Stand J38

### WINTERSTEIGER: TWO NEW INNOVATIONS FOR THE FIRST TIME

Wintersteiger will be presenting its entire product range and introducing two of its innovations for the first time. Firstly, the DSB Compact 310 thin-cutting band saw, a machine that is Wintersteiger's offer for getting started with thin cutting. Secondly,

the Banzo X-Cut band-saw blade, a saw blade with blade widths from 27 – 55 mm, and has a significantly longer service life in comparison to tooth-tip hardened saw blades.

Wintersteiger will also be demonstrating its entire range of

service. In the area of timber repair and cosmetics, Wintersteiger will be presenting the TRC product line with the fully automatic TRC 3000+ and the TRC-M Easy entry model. The thin cutting band saws will be represented by the DSB Twinhead NG XM and the DSB Singlehead 660. In the area of thin cutting frame saws, Wintersteiger will be showcasing the DSG Notum. Carbide-tipped and Stellite® saw blades, developed and manufactured by Wintersteiger, will be rounding up its exhibit programme. The automation specialist VAP, a member of the Wintersteiger group, will be providing information about customer-specific system solutions.

Wintersteiger will be at Hall 12, Stand E48
