

Feeding magazine

An easy way to boost the efficiency of your machines and your work processes.

WINTERSTEIGER offers the optimal solution for increasing efficiency and economy with the feeding magazine as an extension of the band saw.

Inserting multiple blocks of wood helps to eliminate interruptions in the workflow and the use of materials. It enables your employees to operate multiple machines or run multiple work processes at the same time.

Adjusted and optimized for a multitude of WINTERSTEIGER thin-cutting band saws:

- DSB Compact 310
- DSB Singlehead 310
- DSB Singlehead NG XM
- DSB Twinhead NG XM

Perfect interaction between machine and extension:

- The famous, self-explanatory, and simple WINTERSTEIGER ease-of-use
- Integration into the machine control system
- The feed rates of the machine and feeding magazine are synchronized

Your benefits summed up:

- An increase in efficiency as a result of personnel savings
- It is very easy to set different block heights mechanically
- The band saw and feeding magazine work together perfectly
