

Dynamic Disc

Towed 8-row precision spaced planter.

Your benefits summed up:

- Stable basic frame with eight sowing rows and a fold-up drawbar
- Sowing speed of over 4 km/h thanks to a high-speed sowing unit
- The WINTERSTEIGER slotted disk system is not affected by seed size or weight (TSW)
- Absolutely no seed mixing between plots
- Seeds still able to germinate thanks to careful handling
- Very accurate depth control by the openers and excellent seed placement precision
- Seed placement recorded for every plot
- Easy to use thanks to its Easy Plant sowing software, which is intuitive and has a user-friendly interface
- Compact dimensions (L/W/H): 6650/2460/2520 mm
- Weight: 4,700 kg
- Many additional features available: cable winder, GPS control unit, micro-granulate spreader, etc.
