

TRC 1000

TRC Timber Repair & Cosmetics - Locaton: Italy

Year of construction: 2014
Manufacturer: WINTERSTEIGER AG
Machine location: Italy

!! Mediation sale !!

The TRC 1000 benefits summed up:

- Reduction in labor costs
- Craft skills are no more necessary
- Significant reduction of rejects due to perfect filling
- Multicolour repair on the same board if necessary
- Proper repair of defects on the edges
- Harmless filler for people and the environment
- The special injection process guarantees a perfect hold of the filling material in every area of the detected defect
- Large defects are repaired in only one process
- The elements can be stacked immediately after filler injection has taken place

High-tech: Fully automatic 3D scanner.

A further trump card of the TRC wood surface repair plants is the specially developed 3D scanner. It detects and measures the damaged areas in the wood fully automatically and calculates the necessary amount of filler. This enables an exact dosage of the filler, the saving potential compared to manual repair is about 30 %.

Price on request.
