

PREVENTIVE MAINTENANCE PROGRAM 2023

Since 1953, WINTERSTEIGER has served as a trusted partner to our customers around the world. As the global leader in the field of Ski and Snowboard tuning machines, we provide an unmatched level of experience and support for your machine-ry and shop needs. When you sign up for our Preventative Maintenance Program (PMP), our technicians will service your machinery during a scheduled visit and explain the process so you know what to expect. A PMP on your machines can help to prevent costly in-season repairs and downtime during the season when you need your machines most. Flat rate for each machine PMP at a single location (see chart below). The age and condition of your machine may require more than the allotted hours, in which case additional labor will be billed per hour. Additional Travel Fee may apply if you require the PMP service to be performed outside of one of our scheduled service loops to your area.

Please email this completed form to info@canada.wintersteiger.com, contact your local service technician, or navigate to www.wintersteiger.com/msp-ca to sign up online. You can also find our address below, and mail this completed form to our office.

Sign up for your PMP before **May 1st, 2023** and schedule the service with your technician during one of their planned service loops to receive the following benefits:

- **10% discount** on parts and labor used during the PMP
- **Extended payment terms** until Oct. 15, 2023 – service can be scheduled anytime, the invoice isn't due until the Fall
- **Waived Service Fee** on in-season service calls after the PMP – Only pay the service fee once for the entire season

Base Service fee: \$ 575.00 + each machine
