

# PREVENTIVE MAINTENANCE PROGRAM 2025

# WINTERSTEIGER

Thinking about tomorrow.

Your ski tuning machines play an important role in the success of your back shop and regular maintenance is critical to their performance. WINTERSTEIGER offers a comprehensive Preventive Maintenance Program, which includes multi-point inspections to evaluate and replace or repair commonly wearing parts. Our technicians will check that your machine is in alignment with factory specifications and can recommend and perform the service necessary to bring it to a top notch operating level. Our goal in performing Preventive Maintenance is to ensure that your equipment is set to run smoothly and efficiently for the upcoming season. Should you need a service call during the season, and you had Preventive Maintenance done on the machine, our service fee will be waived and you will only be charged the hourly rate.

All machines at a single location are billed at a flat rate, based on the estimated time to perform a complete maintenance service. Depending on the age of your machine, a thorough service might require more than the allotted hours. In this case additional labor will be billed per hour.

#### In addition,

Sign up for your PMP before **May 1<sup>st</sup>, 2025** and schedule the service with your technician during one of their planned service loops to receive the following benefits:

- **10% discount** on parts and labor used during the PMP
- **Extended payment terms** until Oct. 15, 2025 – service can be scheduled anytime, the invoice isn't due until the Fall
- **Waived Service Fee** on subsequent service calls during the coming season
