

Omega SBI

In-Line Stone/Belt Grinder

Year of construction: 2014
Machine location: GSS-11-00266

The compact Omega SBI combines the full range of services of a professional machine for both belt sanding and stone grinding. The compact footprint allows the machine to be placed right next to a wall for additional savings of valuable space. The Omega SBI is generously dimensioned in terms of performance and operator convenience. The touchscreen display on the operator station can be used to store custom grinding programs for the grinding stone and belt modules. Three preferred programs can be assigned to the three "Easy Go" quick selection buttons.

208 220 volt, 1 AC

Located in Salt Lake City, UT. Main Warehouse
